Business & Exhibition Floor

The place for networking meetings. Meet the participants of the event, introduce yourself, make contacts and exchange business cards! Meet our exhibitors and FutureTech partners and get acquainted with their solutions and products. With access to the Business & Exhibition Floor you will have the representatives of the market within your reach.

FutureTech Night

FutureTech Night is an evening event which highlights the first day of the **FutureTech Congress**.

The event brings together representatives of the financial sector, start-ups, companies challenging traditional business models, investors, private equity, capital markets and key companies of the economic sector which realize Big Data projects. The event is a great opportunity to tighten existing business and to establish new business relationships.

*FutureTech Night is only for Platinum and Diamond Attendees.

13:30 – 13:35

InsurTech Digital Congress Opening

Witold Jaworski, Chairman of the Advisory Board of InsurTech Digital Congress; CEO, NIO

Insurance Future

13:35 – 13:50

Keynote speech:

An economists view - finally recovery? Post Brexit, Post Trump impact on the financial market

Lars Christensen, Founder and Owner of Markets and Money Advisory, Denmark

13:50 – 14:30

Debate

- How will new technologies affect and change the insurance sector in 10 years (automation, robotics and smartphone trends)?
- Is traditional insurance coming to an end?
- Will insurance companies still exist in the near future?

Moderator:

Marek Zefrian, President of the Management Board, Starter24

Speakers:

Lars Christensen, Founder and Owner of Markets and Money Advisory, Denmark
Samir El-Alami, Co-Founder, CEO, ONE
Hesus Inoma, Founder & CEO, WeSavvy

Redefining customer needs

14:30 – 15:10

Debate

- What will customers be in the future? What will their needs and behaviours look like?

- Which products and services do customers want? Is the sector ready for that?
- Will insurance products change in the future (e.g. P2P insurance, short term insurance etc.)
- Selling in the future – will robots replace humans?
- Is the second “direct” wave coming?
- Will (and how) insurance marketing change?

Speakers:

Maciej Bryłka, Site Leader, Guidewire

Michał Jackowskiak, CMO, Atos Polska

Atique Waghani, Marketing & Startup Consultant at Waghani Marketing, Mentor at Startupbootcamp FinTech, UK

How do regulations foster/hinder the development of new technologies in insurance?

15:10 – 15:25

Presentation: Regulations – impact on insurtech

Wojciech Rabiej, Senior Advisor, PwC

15:25 – 16:00

Debate

- How to construct regulations to make them foster market development?
- In what way do the present regulations (especially for data protection) support/hinder development/competitiveness of new technologies?
- If new technologies can explore business value from delivered data and reporting systems
- Why direct 2.0 will succeed when direct 1.0 failed?

Speakers:

Paweł Gruza, Undersecretary of State, Ministry of Finance, Poland

Andrzej Lewiński, Deputy of General Personal Data Protection Supervisor in 2006-2016

Konrad Wypchło, Data Division Director and Board Member, ITMAGINATION

16:00 Lunch

Materials printed: 12.05.2017
 The organizer reserves the right to change the agenda.
 Current agenda is available in MMC Polska application

Big Data

1st Day

13:30 – 14:10

Keynote speech:

„Autonomous Decision-Making, Machine Learning, and Artificial Intelligence: What Does It All Mean and Why Should You Care?“

Stephen Brobst, Chief Technology Officer,
Teradata Corporation, USA

14:10 – 14:40

Keynote speech:

Digitizing the physical world

Scott Neuman, Global Marketing Director
IBM Watson IoT, Czech Republic

14:40 – 15:50

Debate

The rise of modern technologies in business: is replacement of human beings with AI the best possible solution?

Block host: Ministry of Economic Development

- The rise of AI: should it become a manager instead of an assistant?
- Human beings vs. AI: in which areas would the machine be more effective? How will job reduction affect business and what benefits could replacement of human beings offer?
- Virtual sales assistant: how will AI development in the industry affect customer service and satisfaction?

- Social media: is it possible to collect additional customer data in real time?
- How to collect and store data (requirements, needs, expectations) obtained during virtual customer service
- Undecided customers: is it possible for AI at this stage of development to apply persuasion and product recommendation techniques in the manner similar to a professional salesperson?
- Artificial intelligence, adaptive algorithms, new generation of malware: are we ready for intelligent threats both inside and outside the organization? What security measures should an average user apply when interacting with AI?

Moderator:

Tim Peters, Partner, Athur D. Little

Speakers:

Tomasz Domański, Principal Data Engineer,
Teradata

Eliza Kruczkowska, CIO, Polish Development Fund

Scott Neuman, Global Marketing Director
IBM Watson IoT, Czech Republic

Wojciech Olechno, Head of B2B Sales,
Samsung Electronics Polska

Paweł Tulin, Lead UX Designer, G2A.COM

15:50 – 16:00

Q&A

16:00 Lunch

2nd Day

9:00 – 9:20

Opening of the 2nd day of the Congress

Fintech Investors perspective

9:20 – 9:35

Presentation: Changing landscape of Fintech investments

Dorota Zimnoch, International FinTech and InsurTech Expert

9:35 – 10:05

Debate: Fintech Investors perspective – key investment theses for next 12 months

Moderator:

Keynote speech:

**Big Data – big challenges for data
protection.**

Edyta Bielak-Jomaa, General Inspector for
Personal Data Protection

13:00 – 13:50

**The impact of the General Data
Protection Regulation on
solutions based on Big Data
processing**

Materials printed: 12.05.2017
The organizer reserves the right
to change the agenda.
Current agenda is available in
MMC Polska application

Debate

Block host: GIODO (Inspector General for Personal Data Protection)

- The need to protect privacy and personal data: profiling, disclosure obligation, privacy by design, PIA, seemingly anonymized data – how to avoid the traps?
- Big Data = Big Responsibility. Challenges for companies, i.e. how to prepare for the implementation of the General Data Protection Regulation (economic aspects).
- Performance of public tasks in the context of implementation of the GDPR: are public authorities prepared for the application of new personal data protection regulations?
- Codes of conduct and certification in the GDPR: a step towards identification of the best practices in business?

Moderator:

Paweł Makowski, General Counselor of Inspector General

Speakers:

Piotr Mechliński, Country Leader for Government and Banking, IBM

Ireneusz Piecuch, Partner, CMS

Jakub Turowski, Head of Public Policy Facebook, Poland & Baltics

Gertruda Uścińska, President of The Social Insurance Institution

13:50 – 14:00**Q&A****14:00 – 14:30****Case study:****How African tech uses AI**

Marek Zmysłowski, International Development Director, Unified Factory S.A.

14:30 – 14:50**Case study:**

See the whole story in your data – how to combine your data closed in various systems and transform it into business benefits.

Piotr Kowal, Presales Team Leader, Qlik

14:50 – 15:50

Technological aspects of implementing Big Data solutions in business

Debate

Block host: IBM

- How to prepare your company for implementing Big Data solutions:
 - What problems might arise during the implementation and how can they be solved?
 - Cost calculation: how to implement a solution which does not cost more than the value of benefits
 - Big Data team: resources, competencies and its place in the organization
 - Data management
- Big Data solutions and technological platforms
 - Customized solutions: how to avoid solutions that do not meet the requirements
 - Solutions in the classic model
 - Cloud-based solutions
 - Uses of Open Source software

Moderator:

Arkadiusz Wiśniewski, Analytics Center Of Competence Director, IBM Analytics, Central & Eastern Europe

Speakers:

Michał Możdżonek, ZUS Board Member supervising IT Department

Tomasz Motyl, Chief Innovation Officer, Alior Bank

Arkadiusz Kalemba, COO & Board Member, Energy Data Lab, ATENDE GROUP

Artur Pollak, President of the Management Board, APA Group

Leszek Maśniak, Chief Data Officer, Political Cabinet of the Minister of Digital Affairs

15:50 – 16:00**Q&A****16:00 Lunch**

is an evening event which highlights the first day of the **FutureTech Congress**.

The event brings together representatives of the financial sector, start-ups, companies challenging traditional business models, investors, private equity, capital markets and key companies of the economic sector which realize Big Data projects. The event is a great opportunity to tighten existing business and to establish new business relationships.

In the era of digital expansion, economic growth based largely on modern technologies, and rapid change taking place in key sectors, resulting from the need to adapt to new needs and demands of digital customers, we are glad to present a project that responds to these challenges.

FutureTech is an event that consists of three projects taking place simultaneously: **FinTech Digital Congress**, **InsurTech Digital Congress** and **BIG DATA: Think Big CEE Congress**.

The purpose for which FutureTech came about was to create a neutral platform for sharing ideas and experiences of firms and institutions that have an impact on the way the sectors grow. The event will bring together key players and architects of the rapidly expanding fintech/insurtech sector: representatives of a mature financial sector, startups, firms which challenge the traditional business models, investors, private equity funds, the capital market, and also firms and institutions handling Big Data projects in key economic sectors.

The highlight of the first day of the congress will be **FutureTech Night**, in which special attention will be paid to the firms and institutions that are causing fintech, insurtech and big data to grow.

Zbigniew Jagiełło Honorary Chairman of the Advisory Board, President of the Management Board, PKO Bank Polski	Tomasz Czechowicz Chairman of the Advisory Board, Managing Partner, President of the Management Board, MCI Capital	Marcin Petrykowski Vice-Chairman of the Advisory Board, Managing Director, S&P Global	Cezary Stypułkowski Honorary Chairman of the Advisory Board, President of the Management Board, mBank	Witold Jaworski Chairman of the Advisory Board, CEO NIO, President of the Management Board, Allianz in 2013-2015	Maciej Witucki Chairman of the Advisory Board, Chairman of the Supervisory Board Orange Poland, President of the Management Board, Work Service S.A. FinTech Digital Congress

The need to effectively combine ideas and capital, anticipation of the changing needs of digital clients, professionalization of services, changes in laws and regulations have all created a demand for a neutral platform allowing for the exchange of experiences, the presentation of solutions and the implementation of best practices in business as well as the distribution of technologies among key participants of the market and new entities. The Fintech Digital Congress is mostly aimed at meeting this demand.

InsurTech Digital Congress

InsurTech Digital Congress is an event aimed at creating a neutral platform for sharing ideas and experiences, leading to the forging of important strategic partnerships between traditional insurance companies and technological startups.

The growing technological awareness of customers, the expanding role of the mobile and internet channel, the need to make use of technological innovation both internally (calculating risk, data analysis, automation of business processes) and externally (creating new, innovative products, sales channels, improving customer service) are reasons for the need to devise a new model for insurance companies and insurtechs to work together, which is precisely what the InsurTech Digital Congress is mainly designed to do.

BIG DATA: Think Big CEE Congress

BIG DATA: Think Big CEE Congress is the response to one of the most important business questions in the region: how to use different, unstructured data? During the course of its five editions, the Congress has established its position as a unique and prestigious meeting of the most important representatives of all sectors of the industry, government and self-government administration, science and media, and at the same time as a unique opportunity to confront and exchange experiences with experts active in this specific and highly promising branch not only when it comes to Big Data, but also with regard to the national and international market, practical use of technologies and solutions. This strategic meeting offers a neutral platform for discussion, an exchange of ideas and experiences.

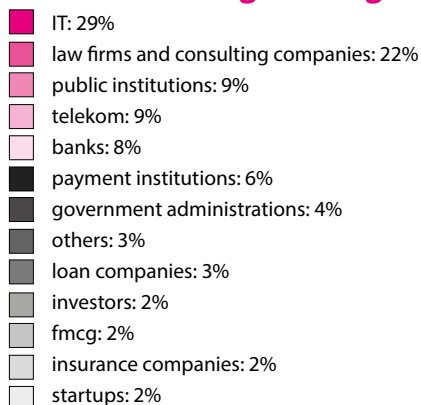

Target group FinTech Digital Congress

Target group InsurTech Digital Congress

Target group BIG DATA: Think Big CEE Congress

1500-2000 participants

International environment

3 thematic paths

Leading regional Congress

What is FinTech?

FinTech Digital Congress will be the exclusive forum for exchanging ideas key players and the creators of dynamically growing Fintech industry:

- Representatives of mature financial sector;
- Start-ups and companies challenging the traditional business models;
- Investors, private equity funds and capital market.

Digitization, technological progress, innovative business models, unifying services market drives the dynamic development of the Fintech industry, having wider and wider impact on the current or future financial services market. The huge potential of this relatively young sector, in addition to creating new value, revives the traditional players by encouraging them to better address the growing needs of modern consumers.

The need to effectively connect ideas with capital anticipation of changing customer requirements of digital professionalization of services, changes in laws and regulations created the need for a neutral platform for the exchange of experience, presentation of solutions, implementation of best business practices and technology transfer between key market players and its new entities. Ago primarily dedicated to the FinTech Digital Congress.

Target group:

- Investors - private equity, venture capital, crowd funding, individual investors
- Banks
- Startups
- Loan companies
- Payment institutions
- Insurance companies
- Technology companies
- Law firms and consulting companies

What the BIG DATA: Think Big CEE Congress is?

The most important know-how of modern business is the knowledge about what data we have, how to understand them and how to use them in a business way. Information invariably is a basic and essential resource that guarantees functioning and company development.

Big Data Volumes are a challenge but also an opportunity to use lots of data that are generated both by the public, administration and business.

Big Data is the response to one of the most important business topics in the region, which are the ability to use data, communication between different types of devices and creation of an ecosystem of products and services.

The event is a unique, prestigious and well-established on the market meeting of the most important representatives of each business sector, government and local administration, media and science specialists. At the same time it creates a unique opportunity to confront and exchange experiences with experts in this specific and extremely fast developing unit of the business who are involved not only in the Big Data area, but also participating in national and international market exchanges and engaged in practical use of technologies and solutions.

Grzegorz Bartler

Business Intelligence Department Director, Polkomtel

Grzegorz Bartler has been involved into the Business Intelligence area since the beginning of his career. For more than 15 years, he gained knowledge in BI area during work at the SAS Institute and providing solutions for the public sector (NBP), banking (Bank Handlowy), insurance (PZU), energy and telecommunications (Play, Telekomunikacja Polska, PTK Centertel, Dialog, Polska Telefonia Cyfrowa i Polkomtel) He was involved in a wide range of BI solutions - data warehouses, reporting and MIS systems, analytical CRM systems (implementation e.i. one of the first solutions in the Polish market supporting churn management), marketing campaign management systems and other information management solutions collected in the data. He was responsible for the development of the CRM analytical area for clients in Poland and in the world. For 7 years he has been working on "the other side" at Polkomtel, ensuring that BI solutions effectively support the organization's strategy and achieve business goals. In recent years he consolidated Business Intelligence for Polkomtel and Cyfrowy Polsat. Currently, he launches the Shared Services Center for Business Intelligence for the Cyfrowy Polsat Group. Regardless of the side he is working on, his motto is - "Thee customer has to be satisfied".

Aleš Bartůněk

Country General Manager, IBM Poland and Baltics

Aleš Bartůněk has become Country General Manager for IBM Poland and Baltics in January 2013. Ales has more than twenty years of industry expertise and sales success across industries within Central and Eastern Europe. Aleš Bartůněk joined IBM in 1998 as the Sales Director for public sector in the Czech Republic. Additionally in 2000, he became responsible for the development of business relationships in Financial Services, Telecommunications and Industry Sectors. In January 2003 he was appointed as General Manager of IBM Czech Republic, responsible for managing all IBM activities in the Czech Republic. After 7 years in the Country General Manager role he was promoted to the position of Vice President, Systems & Technology Group, with the responsibility for Central and Eastern Europe, including Russia/CIS and Turkey territories. Recently he was Vice President, Sales and Distribution, with responsibility for the sales activities of the overall IBM products and services portfolio in the CEE region and also served as Interim Country General Manager for IBM Turkey. Aleš Bartůněk is a graduate of Czech Technical University in Prague with a specialization in Aircraft Technology. Before joining IBM, he held various technical, sales and management positions in leading Czech IT companies and financial institutions.

Speakers / Advisory Board

Andrzej Basiak

President of the Management Board, Lew Group

A graduate of the Technical University of Czestochowa at the Faculty of Management. During his studies, in 1993, he founded his first business (an advertising-consulting agency), which was transformed into a Grupa LEW S.A. in 2012, in which he is the President of the Board. In the years 1994-2000, in parallel with running his business, he worked as an assistant in the Faculty of Management leading courses in management theory, financial analysis and advertising. The first broader business idea of the Grupa LEW (1996) was establishing cooperation with mobile phones operators. Initially as an ERA network agency, and since 2003 as a distributor of all the others operators in Poland. Successes in managing of the ERA salons network were confirmed by the awards at operator conferences - for the quality of services provided and the sales volume achieved. The Grupa LEW in 2004 as one of the first on the market began distributing electronic top-ups for mobile phones through POS terminals. Since 2008 the company has been one of the largest companies in the Silesian Voivodship in terms of revenue. It is consistently implementing the plan of building a comprehensive payment ecosystem by developing a network of Dobry Punkt and Dobry Punkt Finansowy. The innovative approach to running a business and the quality of services provided resulted in: Discovery of the Year and Consumers' Laurel (2008 and 2009) and three Business Gazelle Awards for the most dynamically developing company. An important event in the company's history was receiving the status of the National Paying Authority by the Grupa LEW in 2013. The consequence of the strategy of further development of the managed company and entering into the FinTech sector - was the purchase of a majority stake in the company mPay SA, which uses innovative payment, mobile and financial services software solutions. Personal passions are new technologies, photography, skiing and extraordinary journeys.

Adam Bąkowski

CEO, Navixpert

Since 2012 responsible for managing Navixpert sp. z o.o., leader of polish location based services market, including no 1 polish online navigation, B2B Telematics and technological partner of Link4 (PZU Group) of the first polish user based insurance product Link4 Kasa Wraca. Previously in Onet, Orange.

Norbert Biedrzycki

CEO, Atos Polska, VP CEE System Integration

Since 2016 responsible for the management of the Atos Poland company providing the Polish market IT services and products for all industries, from telecommunications, through the financial sector, trade and industry, to public administration. Previously President of the Board and CEO of ABC Data S.A. and President of the Board and CEO of Sygnity S.A., Norbert Biedrzycki was for 10 years Associate Partner at McKinsey and Consulting Services and Business Development Director at Oracle Corporation. Norbert has broad knowledge in the areas of Business Consulting, Systems Integration as well as Managed Services and is also experienced in the Cloud and IT Security areas.

Edyta Bielak-Jomaa

General Inspector for Personal Data Protection

Ph.D in Law, author of over 30 studies on labour law, labour market and personal data protection issues. Her scientific interests include first of all the issues concerning the protection of employees' personal rights and the protection of personal data in the employment context. She was the first one to start research on the protection of personal data of unemployed persons and job seekers.

Grant Blaisdell

CMO & Co-Founder, Coinfirm Blockchain Lab

A creator, startup entrepreneur and Co-Founder of Coinfirm and the Coinfirm Blockchain Lab, Grant has been engrained within the startup, and creative environments as a unique innovator in the applications of tech across culture and has done so in European, Silicon Valley, and Los Angeles ecosystems. Coinfirm is the blockchain AML/KYC risk and compliance platform that allows for the safe adoption of digital currencies and blockchain and provides seamless and cost-effective compliance for blockchain-based transactions. The platform applies proprietary algorithms that result in actionable conclusions for AML/CFT compliance, credit risk assessment, and increased efficiency. Blockchain agnostic, Coinfirm can be applied to public blockchains such as Bitcoin and Dash as well as private blockchains such as those in development by financial institutions.

As of April 2016, he performs the function of Director of the National Centre for Research and Development. Professor Chorowski is the author or co-author of over 150 publications on cryogenics and energetics.

Lars Christensen

Founder and Owner of Markets and Money Advisory

Lars Christensen is a distinctive voice among monetary and emerging market economists. He accumulated more than 20 years' experience in the public sector and banking before founding his own consultancy, Markets and Money Advisory, which helps governments around the world craft economic policies. His no-nonsense, outside-the-box take on the global economy, markets and geopolitics also makes him a sought-after speaker to multinational companies and financial institutions. Lars made his name with a series of ground-breaking analyses as the Head of Emerging Markets Research at Danske Bank in Copenhagen. In 2006-2008, he warned of an impending economic downturn in Central and Eastern Europe. Most famously, Lars co-authored the "Geyser Crisis" report of 2006 that nailed its prediction of a financial and economic meltdown in Iceland. A biographer of Milton Friedman, Lars worked for five years as a policy analyst at Denmark's Ministry of Economic Affairs (1996-2001). Trained at the University of Copenhagen (M.A. Economics, 1994), he is an internationally recognised specialist on the history of monetary thought and a Senior Fellow at the Adam Smith Institute in London. The Market Monetarist, which Lars began writing in 2011, has become one of the leading international blogs on monetary policy. It takes its name from a term Lars coined. Market Monetarism is a school of economic thought that emerged in the blogosphere. Its proponents (including Lars) want central banks to target nominal gross domestic product (NGDP), not inflation. Among Lars's main interests is monetary policy in commodity exporting countries. He advocates that such states would benefit from introducing an Export Price Norm (EPN), which would peg a country's exchange rate to the price of the commodity it exports and a basket of currencies. Lars has been advising governments of oil exporting countries on economic matters. Lars sits the advisory boards of the Maghreb Economic Forum in Tunisia and Swicorp. He writes a weekly column for Iceland's Fréttablaðið newspaper and is a regular contributor to the Danish business daily Børsen and Geopolitical Intelligence Services. The world's main financial media seek out Lars for quotes and commentary, which can be found in the Financial Times, The Telegraph, Bloomberg News, Thomson Reuters and Dow Jones Newswires, among others.

Speakers / Advisory Board

Piotr Kiciński

Vice-Chairman of the Management Board, Cinkciarz.pl

Piotr Kicinski has near 20-year-experience on the financial market (Citibank, Fortis, the KBC group). In his career he held managing and administrative positions within areas of risk management, product development and sales management. He joined the Cinkciarz.pl group in 2012. Since 2014, he is a Vice-Chairman of the Board. Cinkciarz.pl is one of the fastest growing companies in East and Central Europe. The services of the leading online currency exchange company can be used by companies and institutions settling with foreign contractors as well as individual clients. Since 2010, the company has been successfully functioning on the fin-tech market. The system of solutions provided by the company is an innovative financial product designed and implemented in its entirety by the team of the most skilled IT specialists employed by the company. The company is a member of the SWIFT organization, which includes the largest banks and financial institutions in the world. Soon the brand will enter the market of new financial services. In April this year, a company from the same capital group as Cinkciarz.pl has acquired a Payment Institution License. On the basis of an agent agreement, Cinkciarz.pl can also use said license. This means that the services of the company will not only include currency exchange, but also money orders and payments. In 2013 Cinkciarz.pl became the first Polish financial company to open an international office in London. In 2015 the company opened a representative office in Chicago, in the prestigious Michigan Avenue. Piotr Kicinski has near 20-year-experience on the financial market (Citibank, Fortis, the KBC group). Speakers / Advisory Board

Błażej Marciniak
Founder, CEO, Sher.ly

I'm a network security and data transmissions technologies expert, with 20 years of experience in ITC. My journey began in IT distribution company, moving through logistic, sales and network department gaining invaluable experience as Product Manager, responsible for every aspect of a product life cycle. Tried some US corporations for a while, but learned after two years it's not my thing: moving too slowly and being too conservative. I've moved towards Mobile and worked for 3 years' top mobile bank developing projects: very first mobile mBank and Plus GSM most advanced mobile services gateway: Multinfo.

Frustrated with lacking security in communication services at a time I came up with idea to combine security of Virtual Private Network with ubiquitous connectivity of P2P topology and GatelessVPN technology was conceived. Sher.ly was launched officially at TechCrunch Battlefield conference in Berlin October 28 2013. Year later we've among very few companies from Poland to launch a successful crowdfunding campaign on Kickstarter raising 154.000 for our Sher.ly powered storage device: Sherlybox. Year later, July 27th we started shipping Sherlybox'es to our worldwide backers and selling Sher.ly for Business.

Spiros K. Margaritis
Founder & Venture Capitalist, Margaris Advisory

He is a senior advisor and investor at InsureScan.net (a US insurtech company), Kapilendo.com (the only full-service funding marketplace in Germany) and moneymeets.com (the leading German 'Fintech Supermarket'). An advisory board member at Werthstein.com (a unique Swiss digital wealth management company) and senior advisor at DSER.de (a B2B German fintech company with a client portfolio volume of over EUR 40 billion), he is also a senior advisor to the Fintech Forum (the first and largest hub for fintech in Continental Europe). Previously, he worked in banking and money management (hedge funds) and

launched two start-ups in New York during the dotcom boom and bust period, one of which would nowadays be termed a fintech. He is a frequent speaker at international fintech conferences and publishes articles on his innovation proposals, inspirations and thought leadership. Some of these articles include 'The Fintech Agent', 'Efficient-Banking', and 'Future of Fintech. A Combination of Barbarella & 2001: A Space Odyssey'. One of his innovation proposals, 'The Fintech Supermarket', formed a contribution to The FINTECH Book published in April 2016 by Wiley.

Pedro Martinho
Board Member, Eurocash

After graduation from ISCTE Lisbon University in the field of Management, I started my professional career in Jeronimo Martins, Portugal, in 1994. Then I worked as a Sector Manager at Feira Nova Hypermarket up to 1996. After that I was invited to come to Poland where I worked for Jeronimo Martins from 1997 to 2001. I was promoted to Purchasing Director in Eurocash Cash & Carry and Jumbo hypermarkets. In 2002 I was employed by Oniway Portugal, telecommunication company, as a Sales Director. In March 2003 I decided to come back to Poland and join the team that had bought out Eurocash Cash & Carry of

Jeronimo Martins. From the beginning I have been a Board Member in Eurocash S.A. and I have participated in its development. I have managed such partnerships as Eurocash Franchise (Delikatesy Centrum) and Eurocash Distribution (former Tradis). Currently, I am responsible for: Eurocash Gastronomy, Eurocash Convenience, retail business (including, EKO chain and Frisco.pl), the Group's marketing area as well as cooperation with producers that are our business partners. I am glad that Polish family businesses and Polish entrepreneurs, due to my humble participation, operate in the strongest channel of FMCG market (the small format). They constitute the real modern retail market in Poland because they respond to customer needs in the most flexible way. This is certainly something unique in the whole Europe.

Leszek Maśniak
Chief Data Officer, Political Cabinet of the Minister of Digital Affairs

He is in charge of data management policy in public administration and the projects related to data management field. Scott Neuman
Global Marketing Director IBM Watson IoT

I am currently the Global Marketing Director for IBM Watson Internet of Things (IoT). Watson IoT is a solution platform with artificial intelligence capabilities that learn from, and infuse intelligence into, the new sources of data streaming from the physical world. The Watson IoT business unit is a start-up within IBM. In less than a year, we have established IBM as a leader in the IoT market (according to IDC & Forrester), achieved a #1 ranking in SEO among our competition, and established IBM's branded share of voice at a market leading 30%, while growing the business by double digits in 2016.

Previously I was the Chief Marketing Officer for IBM's Central & Eastern European region. The region covers 29 countries including Russia, Poland, the Czech Republic, and Hungary, and accounts for almost \$2B in revenue. As the CMO, my responsibilities included all levels of marketing and communications spanning every IBM business unit. I am an expert leveraging the interaction of emerging technologies (IoT, Cognitive Computing, Cloud, Mobile and Social) with traditional marketing journeys (discover, learn, try, buy, adopt and advocate). Over the past 17+ years at IBM, I have developed and executed global and local marketing strategies for IBM's software, hardware and consulting services units. With every role, I have deepened my leadership skills and technical knowledge, allowing me to push the boundaries of executing both digital and physical marketing plans. I joined IBM in July of 1999 after receiving an MBA from Cornell's Johnson Graduate School of Management where I majored in marketing. Prior to business school I worked in advertising, spending time as an account executive at both Young & Rubicam and J. Walter Thompson in San Francisco. I also hold a B.S. in Communications from Cornell University. My wife Amy and I live with our three children in Prague, Czech Republic while on international assignment for IBM. Our permanent home is in the US, in Norwich, Vermont.

Michał Niemczycki
Founder & Board Member, Freebee

Co-founder of "Freebee" - the largest digital loyalty platform in Poland, and Co-Ceo of "New Media Ventures" (joint-venture with Grupa Cyfrowy Polsat). By involving various business partners, he proves that the studies can be practical as well as theoretical. The latest project of his is "Data Science" which consists of two specialties: Developer and Data Analyst, conducted in cooperation with such professionals as. Sotrender, OwnedOutcomes, Opentopic. His passion is photography of the one and only Podlasie :)

Ralph Talmont

Speaker, Author and Sensemaker; Team Leader, TEDxWarsaw

Ralph is a creativity and communications consultant, startup founder and innovation catalyst with deep experience in servicing individual, corporate and SME clients on four continents, as a speaker, presenter and advisor. Ralph's involvement with innovation-driven companies began in 1999 when he created the World's first portal for book trade professionals (editing, production and rights management.) Today Ralph uses his innate ability to connect people and concepts and communicate ideas to build value for a variety of online and offline projects, is a founder and advisor to early stage startups, and coaches companies and organisations on creativity and communication. As "sense-maker", with a finely developed understanding of the world of technology, he bridges the digital divide for companies and organisations in transition. As an advisor, working in groups or one-on-one, Ralph weaves together strands of his multidisciplinary experience to deliver effective communication and creative thinking solutions to individuals and organisations. As a presentation coach he zooms in on the precise requirements from content to authentic delivery, and as a creativity catalyst to teams, he combines approaches and tools from the creative industries to bring new ideas and solutions to the fore. Ralph is the author of The Pig, Not the Lipstick: How to bring true innovation by using approaches from the creative industries (coming out in 2017), and over thirty other books on subjects ranging from the World's largest yachts to winemaking and tribal mythology. Over a thirty-year career in visual communications (as photographer, author, producer and designer), Ralph has made retail multimedia products, designed music packaging, produced marketing communications for global hotels and resorts, directed documentary videos and staged collaborative arts events. His photographs have illustrated the pages of leading magazines and, together with his writing and design, helped corporates such as Siemens, Nike and Commercial Union tell their stories. He is the curator and Team Leader for TEDxWarsaw, Poland's first and largest annual TEDx conference (including TEDxWarsawPresidentialPalace, the first TEDx in the World to be opened by a sitting head of state,) a TEDxSeniorAmbassador for Eastern Europe, and regularly contributes to other media, design and innovation events globally. He consults through his Brighton based innovation and creative shop Elevator.agency and works closely with the Warsaw-based consultancy Amati & Associates. He is a guest lecturer at Warsaw's Academy of Fine Arts School of Design, a co-founder of Seriatim Foundation, an NGO which helps people improve their communication skills, and a mentor at Founder Institute and PwC Startup Collider.

Jeffrey Tijssen

EMEA Head of FinTech & Partnerships, Capco

IWOCA

iwoca offers flexible credit to small businesses across Europe, allowing them to take advantage of opportunities previously only available to their larger peers. From placing larger stock orders to bridging cashflow gaps, finance helps power our customer's growth.

We launched iwoca in 2012 and have already grown into one of Europe's leading fintech lenders. More startup than financial institution, we use technology to eliminate the cost and complexity associated with traditional business finance. That means we offer instant decisions and have no upfront fees, no lengthy forms and no long-term commitments.

Most importantly technology has allowed us to build a revolutionary risk model that understands any small business based on its trading data. Take an online retailer for example - analysing customer feedback scores, seasonal trends and profit margins helps us to predict the company's future health. In fact we look at thousands of data points for every applicant to make fair lending decisions, instantly.

iwoca is the Alternative Commercial Lender of the Year, the Fintech Lender of the Year and has the Best Analytics in Lending according to Credit Awards.

SAMSUNG

For over 70 years, Samsung has been dedicated to making a better world through diverse businesses that today span advanced technology, semiconductors, skyscraper and plant construction, petrochemicals, fashion, medicine, finance, hotels, and more. Our flagship company, Samsung Electronics, leads the global market in high-tech electronics manufacturing and digital media.

STARTER24

Starter24 Sp. z o.o. is a nationwide company providing professional assistance services, which has grown on the basis of roadside assistance, but now also offers other types of assistance and complementary services.

As the only company in Poland Starter24 guarantees assistance with car repair directly on the road. This is possible thanks to a large group of trained mobile mechanics and the network of mobile garages. These are characteristic yellow service cars equipped with specialized diagnostic tools and equipment. Currently, Starter24 focuses its business on B2B clients, where, in addition to the largest car manufacturers, the main customer group are CFM companies and Insurers. The company as a service provider, through its own call center and partner network in Poland and abroad, handles more than 150 different assistance programs. These programs are operated under the brands of the principals such as Audi Assistance, Ford Assistance, KIA Assistance, TUW Auto and Home Assistance and LeasePlan Assistance.

Starter24 is a leading company on the Polish assistance market, with almost 50% of market shares in car producers assistance segment and more than 40% CFM assistance programs.

Nowadays the company diversifies its activities in complementary areas, including claims settlement and call center services, as well as being an industry leader in innovation and modern technology.

Our main goal is to manage assets entrusted by our clients as effectively as possible. PZU Investments is an active player in the global financial market. As part of our business, we invest money in almost all world markets, using a wide range of quoted instruments. Our product portfolio covers UCITS open-end funds, AIF closed-end funds and specialized open-end funds with variety investment strategies, annuity investment plans and pension schemes.

URSUS

VISA

Visa Inc. (NYSE:V) is a global payments technology company that connects consumers, businesses, financial institutions, and governments in more than 200 countries and territories to fast, secure and reliable electronic payments. We operate one of the world's most advanced processing networks — VisaNet — that is capable of handling more than 65,000 transaction messages a second, with fraud protection for consumers and assured payment for merchants. Visa is not a bank and does not issue cards, extend credit or set rates and fees for consumers. Visa's innovations, however, enable its financial institution customers to offer consumers more choices: pay now with debit, pay ahead with prepaid or pay later with credit products. For more information, visit our websites (www.visaeurope.com, www.visa.pl), the Visa Vision blog (vision.visaeurope.com), and @VisaEuropeNews, @Visa_PL.

VIVUS

Vivus Finance is a leader, of online consumer finance market in Poland. The company has been founded in 2012. Led by highly skilled managers mostly with executive banking experience. BEYOND

Beyond.pl is an innovative, leading data center operator that provides business with reliable IT infrastructure. Company was established in 2005 and since then is flagship brand for data center and cloud computing services, with customers from whole range of industries. It's also first carrier-neutral data center in Poland with access to Tier 1 carriers and all Internet Exchange points. Beyond's infrastructure includes two state-of-the-art data centers with over 12 000 sq m of total colocation space with Beyond.pl Data center 2 being the biggest, and most innovative facility in the country.

Beyond.pl distinguishes itself on the market thanks to a complex approach towards its customers' IT needs. It is among TOP 3 Poland Data Centers Providers, number 1 quality leader and the only one data center provider with managed services.

What distinguishes us?

At Beyond.pl, we operate from our own data centers, which are the most energy efficient on the market and meet the highest Rating 3 and Rating 4 security standards.

It guarantees the high standard of delivered solutions, security of your data and cost efficiency of your IT projects.

We stand out on the market first of all thanks to our comprehensive approach to Client needs and perfect quality of technologies used.

Beyond.pl is the first carrier neutral data center in Poland. Our company also initiated and founded Poznan Internet eXchange, PIX. It lets us provide our Clients with the best connection and availability conditions, perfect for companies looking for competitive advantage on the current business market.

Key values:

Security - Beyond.pl Data Center 2 is the first Data Center in CEE that

meets the highest security standards - Rating 4 according to ANSI/TIA-942, providing 99.995% availability in military grade facility.

Performance

Beyond.pl data center was designed to provide high density computing altogether with high power efficiency at PUE 1.1 & PUE 1.4.

Innovation

Beyond.pl is the only company in Poland that offers agnostic cloud computing

approach, providing : VMware, Hyper-V and opensource based clouds platforms (e24cloud.com).

Transparency

We believe that carrier neutrality and transparent approach to technical design of our solutions altogether with sharing knowledge with our customers is a key success factor for building mutual trust.

BLIK

BLIK is the first widely available mobile payment system created in Poland, launched, developed and managed by PSP (Polski standard Płatności). The company is owned by six Polish banks, (Alior Bank, Bank Millennium, Bank Zachodni WBK, ING Bank Śląski, mBank, which also offers financial services under the Orange Finanse brand, PKO Bank Polski and Inteligo). Through the client base of the PSP shareholders, BLIK is available to 60% of all banking customers in Poland. The system has been designed to allow new banks and financial companies operating in the country to quickly get on board. Since May 2016, BLIK has also been available to clients of Getin Noble Bank, since October clients of T-Mobile Usługi Bankowe, and more new issuers and payment agents are finalizing their procedures to join the system.

The launch of BLIK has been a breakthrough moment on the way to establish a unified, widespread mobile payment standard scheme using state of the art technologies. The openness to collaborate with other financial institutions on equal grounds creates a perspective for rapid development of the system and steady growth of a network of merchants accepting mobile payments through a smartphone. This guarantees the system's ability to offer a wide range of payment possibilities to all BLIK users.

CALLPAGE

CallPage - is an international technology company operating in the ICT market, which created a platform which helps companies increase sales and improve contact with customers via the website. Tool CallPage, help companies improve conversion on the page and the number of phone sales up to 75%.

The main product CallPage is a widget for corporate website. After the installation of widget, the algorithm tracks user behavior on the website. CallPage measures time spent by customer on the site, frequency and many other parameters to help determine whether the user is a potential customer. When the system detects a potential customer displays his proposal to encourage rapid contact with the consultant. After entering the customer your phone number to the widget system CallPage makes the company automatically calls back to the customer in less than 30 seconds. As a result, the number of phones from and sales to grow by up to 75%.

CallPage for this moment uses 1,000 companies from twenty different countries, including Orange, PWC, Toyota and other companies. The main customers of CallPage are companies in the telecommunications, medical and automotive industries.

Among the investors of the company can be found, such polish businessmen as Marian Owerko (Bakalland), Rafal Brzoska (InPost) and Tomasz Misiak (Work Service)

CallPage employees have competence in the field of customer service, online marketing, webdesign, programming, conversion optimization and telephone sales.

By combining the experience of team members, as well as the use of Internet technologies, CallPage gained a strong position, not only on the Polish market and but also at international and now is a leader among the companies that provide this type of service.

IBM

In 2011 IBM celebrated its centennial. The company offers a wide range of consulting and IT services, software, systems and technologies. In its strategy, IBM will continue transformation to growth and focus on key plays of cloud computing, Big Data and analytics, mobile and social.

IBM established its first operations in Poland in 1991 with its headquarters in the country's capital Warsaw. Today IBM also has a number of key facilities across Poland serving clients around the world, including IBM Services Delivery Center and Security Operations Center in Wrocław, IBM Services Delivery Center in Katowice, IBM Global Process Services Center, IBM Software Laboratory in Krakow and IBM Competence Implementation Center in Gdansk. IBM works closely with customers of all major sectors: finance, telecommunications, industry, energy, automotive, public administration, as well as Mid Market.

Listed on the Warsaw Stock Exchange (WSE:IDA), Idea Bank supports Poland's dynamic entrepreneurial culture by offering its clients a 360-degree assistance on all stages of business development: from the registration of a new company with the authorities, to bookkeeping, and financial advisory in the first phases of growth.

Only in the last two years Idea Bank managed to launch multiple revolutionary projects that largely contributed to its reputational success and increasing competitive advantage. Idea Bank is currently the fastest developing Polish bank and a leader in SME banking. At the end of last year the bank maintained 61 branches, offering services to 240 thousand clients.

Idea Bank's approach towards supporting entrepreneurs is very unique. It has always been the company's primary focus, no matter what the challenge. Idea Bank keeps close to entrepreneurs, watches their daily lives, knows their problems and needs. Entrepreneurs often use cash, make complicated banking transactions, they are overwhelmed by bureaucracy, rarely have their own office, cannot afford promotional activities. Idea Bank's solutions meet their needs. In order to enhance its clients' comfort and safety when making a deposit, the bank delivers an app-managed "Mobile ATM". Seeking to provide comfortable workspace to the self-employed with no office of their own, it has been transforming its branches into "Idea Hub" co-working venues. And with an aim to lift the administrative burden off entrepreneurs' shoulders and help them save time, the bank has developed "Idea Cloud", a business management platform. The bank has also launched the "Be Proud" program to help entrepreneurs promote their businesses in the media. All these solutions are free.

For its activities, innovations and creative approach to marketing, the bank has won a number of prestigious awards in Poland and abroad. Among the awards are: Efma konkursie Distribution & Marketing Innovation Awards, Fintech Innovation Awards, BAI Finacle Global Banking Innovation Awards, BBA/IFS Financial Innovation Awards, , Global Business Excellence Awards, Best in Biz, B2B Awards, European Business Awards, Stevie Awards and Sabre Awards.

KRAJOWA IZBA ROZLICZENIOWA S.A.

Formed on the initiative of the National Bank of Poland, the Polish Banks Association, and 16 commercial banks in order to launch electronic and professional interbank clearing in Poland, KIR is celebrating the 25th anniversary of its operations in 2017. We are the key firm serving the Polish banking sector infrastructure. We ensure reliability and security of the provided services while striving to effectively foster the development of cashless transactions.

Over 1.7 billion transactions are processed yearly via the clearing systems operated by KIR, i.e. Elixir, Express Elixir and Euro Elixir; they are used to clear standard and instant interbank transfers in the Polish currency, as well as domestic and cross-border transfers in EUR. The Elixir system is considered by the National Bank of Poland as the Systemically Important Payment System (SIPS), which confirms its significance for the operation of the Polish banking sector and efficient flow of payment data. The Express Elixir system allowing immediate transfers, including transfers to mobile phone numbers, has been implemented by KIR as one of the first such solutions in the world. As the SWIFT Service Bureau, we also provide access to the global SWIFTNet network.

The latest product launched by KIR is Inkart - the local card payments clearing system handling card transactions at points of sale, ATMs, and other devices located throughout Poland using payment cards issued by banks operating in Poland.

Enabling secure and fast on-line communication between banks and other entities authorized to access banking secrets, KIR provides the Ognivo system, which allows e.g. transfer of accounts between banks, obtaining reports as a part of the Central information on accounts and digitization of debt seizures on debtor's account.

Paybynet is a system enabling direct and guaranteed online payments for e-commerce transactions. The system is used by the public administration entities, also as the webPOS application for mobile devices. KIR's offer also includes solutions aimed at supporting the development of cashless payment market in Poland, such as the Szafrir electronic signature, and Invoobill – a service of an EBPP type (Electronic Bill Presentment and Payment), operating via electronic banking channels.

Using the unique competence and experience in the Polish market, KIR is developing and providing system solutions suited to the needs of the banking sector, and actively participates in the digitalization process of the public administration.

More about KIR: www.kir.pl

dLK Legal is a modern legal practice with a practice focus centred around the financial and new technologies sector, providing assistance in regulatory, transactional and litigation matters. dLK specialises in advising banks, payment service providers, investment funds and firms on the insurance market, and companies in the IT sector, and clients and entities with which they do business. We provide assistance to entities which are subject to regulation for instance with respect to banking and payment services law, compliance issues, AML, corporate law, IT and personal data protection law, and consumer law. Specialists at the firm advise on the implementation of numerous projects which combine elements of banking and new technologies, taking part in work on key innovations in the financial sector, such as implementation of third-party provider access, Blockchain's distributed ledger, and universal immediate payments.

In connection with membership of the network World IT Lawyers, and in collaboration with the European Payments Consulting Association (EPCA), we handle numerous cross-border projects. Experts at dLK participate in "Blockchain and cryptocurrency" streaming works conducted at the Ministry of Digitisation as part of the "from a Paper to a Paperless Poland" scheme. Lawyers at dLK also participated in work on a report on the "Study Impact of the PSD" and "Principles, Definitions and Model Rules of European Private Law" for the European Commission. Lawyers at the firm have authored numerous publications, legal analyses and commentaries, and speak at prestigious sector events in Poland, Europe, the US, and Asia. They also share their knowledge and many years of experience in their work as academic lecturers.

OKI Europe Ltd is a division of OKI Data Corporation, a global business-to-business brand dedicated to creating cost effective, professional in-house printers, applications and services which are designed to increase the efficiency of today's and tomorrow's businesses.

The company is well-established as one of Europe's leading printer brands, in terms of value and units shipped. For over 60 years OKI Europe has been delivering advanced printing solutions worldwide, introducing ground-breaking technologies that support the needs of businesses large and small. Our pioneering development of digital LED printing technology has placed OKI at the forefront of the market in delivering high-definition, eco-friendly printing devices.

In addition to a vast portfolio of award-winning printers and MFPs, OKI offers a range of services to help optimise print and document workflows.
